SchoolworX provides the ability to easily manage and access the summary and detail student information anytime, anywhere! SchoolworX identifies issues early and streamlines communication for teachers, students, parents.

Convenient Web-based Access

All users, including teachers, administration, students and parents have convenient access to school and student information through the internet anytime, anywhere.

Improved Efficiency

No more double handling of information or paperbased systems. For example Attendance data can be entered at the source and management have immediate access to absent students or late arrivals.

Centralised Data

The SchoolworX database is the single source of information for all student information needs. Data includes personal and performance details including student profile, attendance data, timetable information, welfare records, markbook and reports.

Customise and Integrate

SchoolworX can be customised to your specific requirements. SchoolworX integrates with your favourite applications delivering a single point of access to all data. For example SchoolworX interfaces to your timetable application to provide web-based access to teacher and student timetables.

Pro-Active Alerts

SchoolworX Analytics technology has the ability to provide early warning for specified events. For example alerts can be set for attendance or welfare issues for early notification.

Parent/Teacher Communication

SchoolworX provides a central platform for communication between teachers, student and parents. SchoolworX includes calendar, email and SMS capability to inform and notify students and parents.

Reliable & Secure

SchoolworX is based on mission-critical and scalable Microsoft technology. SchoolworX contains a roll-based security regime that fits-in seamlessly with your schools existing authentication systems. All major browsers are supported as well as mobile devices including iPads and Android devices.

Flexible Deployment

SchoolworX can be deployed as an enterprise-based student management solution meeting school system objectives as well as providing school level features and functionality. Alternatively individual SchoolworX modules such as Attendance can easily be integrated and deployed alongside existing modules to complement your current systems.

For School Executive

SchoolworX highlights key issues so that you know what's happening, as it happens. For example Attendance and Welfare issues can be presented on an exception basis. All student information is on your fingertips and additional notes and comments can be created and stored on the student record and shared with other teachers. SchoolworX provides data Analysis capability to identify trends across the student population or individual students so that early action can be taken.

For Teachers and Administration

Teachers can now enter roll calls directly into SchoolworX. Late-notes are automatically generated and SMS parent notification is automated. Room bookings, clinic attendance, sports management are some of the utilities that make it easy to manage day to day tasks. SchoolworX Markbook and Student are fully integrated and accessible through the internet.

For Students and Parents

Students and parents have direct access to the relevant student data including school calendar, attendance & welfare data and reports. SchoolworX streamlines communication through email and SMS communication and reminders.

SchoolworX-Modules

- Student Profile
- Attendance (Daily and Period)
- Welfare
- Mark Book
- Academic Reports
- Student Analytics
- Student Portal

Additional Features

- Family and Medical Details
- Student/Teacher Timetable
- Extracurricular Activities
- Merits and Awards
- Calendars
- Learning Provisions
- Customised letter generation
- Naplan data import

Single point of access to all student information
